Date: 08/08/2019

To,

Dean Research

University of Technology

Vatika, Jaipur

Subject: Implementation of URKUND Software for Plagiarism Detection

This is to inform all concerned that the University will begin utilizing URKUND Software to detect plagiarism in research papers, synopses, and theses. This decision is in line with Government directives, as detailed in the communication dated 28.06.2019 from the Hon'ble Director of the INFLIBNET Centre, Gandhinagar. The Information and Library Network Centre (INFLIBNET), an Inter-University Centre of UGC, has provided this Plagiarism Detection Software (PDS) to universities and institutions to enhance research quality and prevent plagiarism in academic publications.

As part of our commitment to upholding high standards of research integrity and academic excellence, the University of Technology will implement the URKUND software provided through INFLIBNET.
