Rajasthan 303903

1<sup>st</sup> Cycle  
Assessment & Accreditation by NAAC

Criterion - VII  
**INSTITUTIONAL VALUES AND BEST PRACTICES**

7.2.1  
Best practices Successfully Implemented by the  
Institution ad per NAAC

(Geotagged Photos in any other relevant information link)

**7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.**

**Best Practice – 1**

**1. Title of the Practice:-**

Transparency in Administration and Academics using **Enterprise Resource Planning (ERP) / Learning Management System (LMS)**

**2. Objectives of the Practice :-**

University of Technology ensures transparency and control in the academic, administrative and assessment activities of the university. To ensure that students can access study material, results & information from anywhere and anytime. To ensure anytime & anywhere access of information to faculty & staff members for academic & administrative purpose and efficient utilization of their time. To ensure on time and hands-on information regarding examination, time table, continuous evaluation to students. Reduce use of paper by implementing ERP. The overall objective of being a center of excellence has been facilitated by implementing ERP.

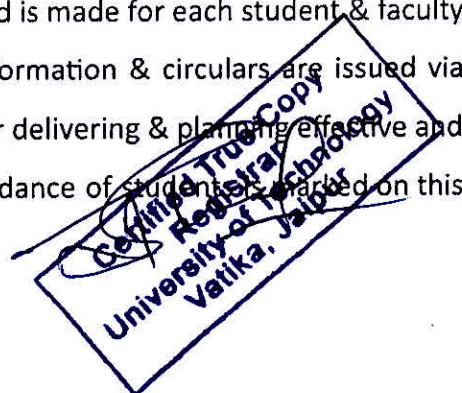

**3. The Context :-**

Evidence of Success owing to the Lockdown of COVID-19, from 15th March 2020, the offline classes were suspended as a precautionary measure all over the country. UOT was one of the first educational institutes which was able to start online classes/online workshop/conferences/webinar/Development program in lockdown.

**4. The Practice :-**

UOT has MOU's with many more organizations, one of the world's leading software solution providers as a service provider of its ERP & LMS.

University has the subscription of Gmail and separate mail id is made for each student & faculty member. All communication is done via Gmail only. All information & circulars are issued via Gmail, along with ERP /LMS provides a dynamic platform for delivering & planning effective and interactive teaching. Classes are mapped on LMS, the attendance of students is marked on this

system. Lesson plan is shared. Students can access the uploaded material anywhere and at any time. The Library of the university is integrated through the library module, all accession & issuing of books is done through ERP. It ensures proper record keeping and safety of books. The Examination process is also managed by ERP which includes hall ticket generation to display exam results. The examination process on ERP can be used to manage both regular and backlog examinations. Subject

#### **5. Evidence of Success:-**

The ERP system eventually has helped in improving the output of Students, Faculty & University at large. Students have become very much comfortable in working on digital platforms. This system has helped to bridge the capability gap, since almost all business organizations today are functioning with the help of ERP.

#### **6. Problems Encountered and Resources Required :-**

University understands that many students who come from tier-III or rural backgrounds might take some time to be comfortable with this practice. Therefore, the university conducts extensive orientation sessions on LMS before the beginning of the first semester of all programs. New Faculty members are compulsorily given training for working on LMS by IT Cell during their orientation session upon their joining, as they may not have the past experience of delivering lectures.

#### **7. Notes (Optional)**

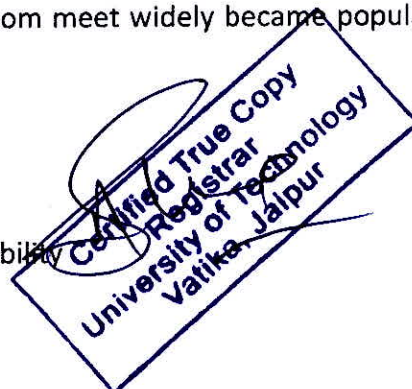

University believes that all higher education institutes should implement a modern education delivery system in their campus. The needs of university students are different, which consists of access to the latest updated information of their subjects. The practice of using webinars, seminars and video conferencing via Google meet / Zoom meet widely became popular during COVID-19.

#### **Best Practice – 2**

##### **1. Title of the Practice :-**

Efforts on Environment Conservation & Sustainability

##### **2. Objectives of the Practice :-**

The Major objectives of this practice are, to be an active partner in ensuring environment Conservation & sustainability at regional level by involving and sensitizing students, faculty, staff & community.

### **3. The Context -**

As mentioned in our constitution, it shall be the duty of every citizen to protect and improve the natural environment of the University since its inception has kept environment conservation & sustainability a focus area in its functioning and believes that this can only be achieved if all stakeholders work in this direction.

### **4. The Practice :-**

Environment related commemorative days such as Water Day, World Environment, etc day are celebrated at the university. University has been both encouraging & participating with the community for plantation drives conducted every year.

### **5. Evidence of Success**

#### **UOT has received following awards for this practice-**

**Best EMERGING University in North India** - UOT has been Named Best Emerging University in North India at the 13th Asia Education Summit & Awards 2023 held in New Delhi

Listed in Top 25 Universities :- In a survey conducted by Higher Education Review, UOT Vatika, Jaipur has been ranked among the top 25 universities in India for the year 2019.

## Best Practice – 3

### Title-Village Adoption (Vatika Village)

#### Introduction

Community service is an integral part of educational institutions, fostering a spirit of social responsibility among students. The University of Technology has embraced this ethos through its Village Adoption Program, focusing on Vatika Village. This initiative aims to uplift the community through various services, including wheat distribution and uniform provision, thereby enhancing the quality of life for its residents.

#### Understanding the Needs of Vatika Village

Vatika Village, like many rural areas, faces challenges related to poverty, education, and access to essential resources. The university's involvement aims to identify these needs and provide targeted support. By engaging with local residents and leaders, students and faculty can tailor their initiatives to effectively address the community's most pressing issues.

#### Wheat Distribution: Nourishing the Community

One of the primary initiatives undertaken by the university is the distribution of wheat to the villagers. Food security is a critical concern, and many families in Vatika struggle to afford basic necessities. The university organizes wheat distribution drives, where students volunteer to package and distribute the grain to families in need. This initiative not only alleviates immediate hunger but also promotes health and nutrition within the community. By ensuring that families have access to a staple food source, the university helps foster a sense of stability and security. Additionally, the program encourages students to develop empathy and a deeper understanding of the challenges faced by rural communities.

#### Uniform Distribution: Empowering Education

Education is a vital component of community development. However, many children in Vatika Village lack access to basic school supplies, including uniforms. The University of Technology has recognized this need and initiated a uniform distribution program aimed at promoting education and attendance.

By providing uniforms to children, the university helps remove financial barriers that may prevent them from attending school. This initiative not only boosts enrollment rates but also instills a sense of pride and belonging among students. When children wear uniforms, they are more likely to feel included and motivated to participate in their education.

#### **Engagement and Empowerment**

The Village Adoption Program is not just about providing resources; it also emphasizes engagement and empowerment. Students from the university work closely with the villagers to understand their needs and encourage community participation. This collaborative approach fosters a sense of ownership among residents, making them active participants in the development process.

Workshops and educational sessions are also conducted to teach villagers essential skills, such as agricultural techniques, financial literacy, and health awareness. This holistic approach ensures that the community can sustain its growth and development in the long term.

#### **Evidence of Success**
